## Software for the office

Designed for network-wide settings, the EIZO Monitor Configurator makes installation quicker and easier if many or all of the monitors at a company need to have the same settings. This software allows system administrators to create and distribute monitor configurations through a USB connection.

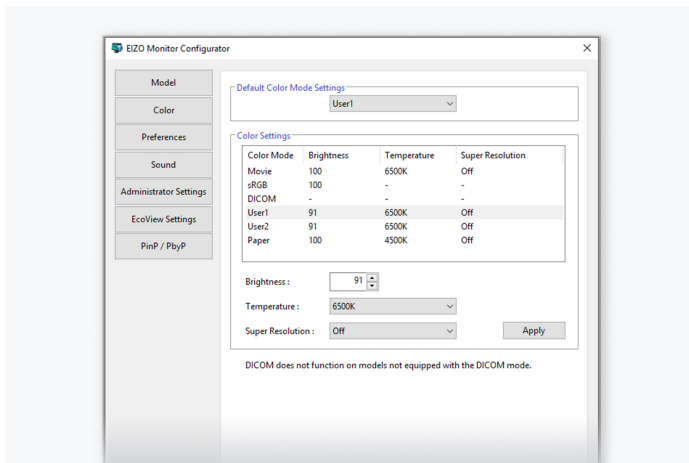

## Monitor configurations via USB connection

This software allows system administrators to create and distribute monitor configurations through a USB connection. Moreover, the settings of a configured monitor that serves as a template can be saved as an XML file and transferred to additional connected monitors.

### Create settings for the office

With EIZO Monitor Configurator, system administrators can create default settings for monitors in the office.

For instance, the administrator can create default settings with Paper Mode (Blue Light Reduced Mode) and ideal brightness for ambient lighting environment to prevent eyestrain when reading documents.

## Technical Data

---
